Join a community of history lovers in the 2022 Upstander Institute: The Power of Testimony. In this week-long program, participants will uncover the past and realize the importance of testimony in shaping our understanding of history. Participants will meet expert historians and educators, follow along on specialized tours, join behind-the-scenes Museum activities, and attend private survivor presentations. Each week will culminate in a final project in which participants will conduct high-level research and present their findings. All programs are offered in-person at the Museum or virtually.
